Leaded Art, Bevel Plate and Clear Crystal Glass

WE illustrate on these pages a few selections from the many handsome designs of art glass contained in our Special Art Glass Catalog.

We have our own art glass factory under the personal supervision of one of the most skillful artists in this line and are equipped for the production of strictly first-class work of any description, giving special attention to fine memorial work for churches and lodges. We can make up any design wanted in art glass—whether shown in this catalog or our large special art glass catalog or the catalogs of other houses.

Having this branch of work under our own personal supervision we can absolutely guarantee everything to be of the highest order, both in materials used and workmanship. Our color combinations are especially artistic, the different colors harmonizing perfectly.

We use the latest ideas in opalescent and variegated cathedrals very largely in making up our color schemes. We can reproduce the lights in exactly the colors shown or will vary them to conform with your ideas.

Special Art Glass Catalog No. 28 will be sent on request.
